

STACS *hack*

21-22 FEBRUARY

BECOME A STACS SPONSOR

STACS is the society within the University of St Andrews for those with a keen interest in Computer Science and Software Engineering. Our membership has a wealth of talent and innovation, which for the previous two years has lead us to win or come second in every hackathon we've attended! Ranking 1st in the UK for Computer Science, St Andrews really is the place to be for tomorrow's software engineers.

WHY YOU SHOULD SPONSOR US

We are offering you a unique opportunity to engage with the STACS community by becoming an official STACS sponsor. This entitles you to the following:

We will put your logo on our society clothing. Not only does this increase your brand presence within the St Andrews computing community, but you will also gain exposure for your brand in other universities as we attend hackathons all around the country.

We will make recruiting St Andrews graduates easier than ever by circulating your emails to our membership, with details of internship or job opportunities (and whatever other messages you like)!

Any publicity, online or offline, that we produce for the society will have your company's logo! Our publicity is your publicity, too!
